

Stingray Percussion offers drum sets designed with the professional artist in mind.

Durable shells, individually hand crafted, create a rich, vibrant sound unmatched by others.

Made of fiberglass, Stingray shells have proved to be one of the strongest shells on the market. The solid one-piece construction is designed to handle your frequent set-ups from one performance to the next.

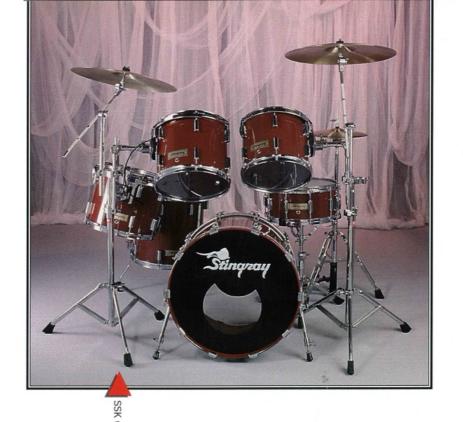

Guaranteed to repel the elements, these shells will not warp, expand, contract or dry out. Unlike plastic coverings used on wood shells, Stingray's high gloss shells require no periodic recovering.

Stingray offers the Power Tom Series ... a drum set creating a fuller, deeper, dynamic sound.

Although the charts throughout the brochure indicate standard drum set packages, any combination of drums may be custom ordered. Standard colors include: aqua, caribbean blue granite, green, burgandy, red, white, yellow, purple and black. Custom colors available upon request. All drum sets may be ordered with bass mount toms (BM), rack mount toms (RM) or tom stand mounts (TS). When ordering, add the suffix in () to the model number. Hardware is not included in drum set packages but may be ordered separately. Stingray shells carry an industry leading limited 5 - year warranty.

The Unishell Snare, offered exclusively by Stingray, is the first of its kind to hit the market.

Using state-of-the-art technology, Stingray has developed a solid one-piece fiberglass snare designed in such a way that no hardware penetrates the shell anywhere.

Carefully hand crafted, the Unishell gives the snare the opportunity to sound like it was intended ... deeper and fuller, complementing the tone of the rest of the set.

Stingray's Standard Snare is also made of solid one-piece fiberglass construction. This snare obtains the definitive sound quality professionals desire to enhance music to its fullest.

POWER WEDGE UNISHELL

STINGER

tingray's Unishell is an exciting new

breakthrough in marching percussion.

The ingenious design of the Unishell eliminates the need for metal edge rings, tension posts and lug casings, making the shell highly resonant. Except for the high torque steel inserts, Stingray's Unishell is the first metal-free drum. Nowhere on the drum does metal penetrate the shell. With a high torque tension ring, new lightweight aluminum alloy die cast hoops and 6mm tension rods, the Unishell will withstand unlimited tension from any head available. Creating a rich vibrant sound unparalleled by others, the Unishell is available in the Power Wedge model and the Stinger model.

COMFORT CARRIER

tingray's versatile comfort carrier is designed to meet your needs for snare, tenor and bass drums. Made of solid fiberglass construction, this carrier is guaranteed to be comfortable and lightweight. Die cast slide mounts allow the J-hooks to adjust easily to various heights. Comfort carriers ordered for tenor drums include a lightweight aluminum back bar with spacers to secure the drums in position.

The comfort carrier allows the instruments to be adjusted to any angle desired.

SNARE	SCC - 0001
BASS	BCC - 0002
TENOR	TCC - 0003

**PWCT** 

tingray's Concert Toms are designed with solid one-piece fiberglass shells, enhancing the rich vibrant sound demanded by champions. These concert toms are available in the Standard Series (SCT) or the Power Wedge Series (PWCT), designed to project the sound to the audience.

Both series are available in 6", 8", 10", 12", 13", 14", or 16".

Standard colors for all Stingray marching drums include red, white or black. Other colors may be custom ordered. Stingray shells carry an industry leading limited 5 year warranty.

MADE IN THE U.S.A.

THE DIMENSION WAVE

INNOVATION IN MARCHING PERCUSSION

## Who Says Depth Equals Projection?

At Stingray, we've discovered just the opposite. Our new Soundwave™ marching snare drum amplifies projection to levels that were once unattainable. In fact, we were so impressed after field-testing the Soundwave™, we decided to promote it as the new flagship of the Stingray Marching Percussion line.

## **Welcome To The Future!**

Once you hear this drum for yourself, you'll realize why we think a tenor drum with a snare strainer will soon prove to be as popular as a marching tympani. At 14" x 8.5", the Soundwave™ sends the sound to the stands with the best resonance and most direct attack you've ever heard. Compared to the Soundwave™, conventional marching snare drums simply don't cut it any more.

# The Innovation Doesn't Stop There.

Stingray's Soundwave™ is the only snare that contains a true "free-floating shell" without the use of counterhoops. The shell is manufactured with an inner 3" bi-axial reinforcement band at the top. The drum comes standard with a die-cast hoop and grade A hardware. The heavy-duty snare strainer features vertical and horizontal adjustment knobs plus individual snare tuning screws. This single moving part mechanism is the toughest, most dependable one in the industry. There are virtually no breakable parts. But if an emergency

does arise, any necessary nuts and bolts can be replaced with a visit to your local hardware store. Last but not least, the Soundwave™ weighs less than other conventional snares and offers better freedom of leg movement for today's demanding choreography.

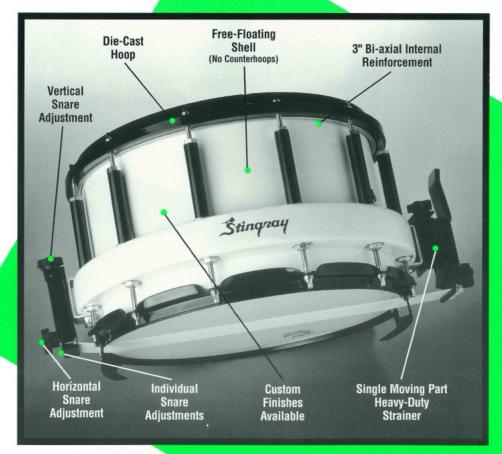

## The Switch Is On!

More and more drumlines are finding out what Stingray has known since its inception. Fiberglass shells simply out-perform wood shells. Superior sound, projection, resonance, strength and durability are all natural characteristics of Stingray fiberglass shells.

Remember the last time your drumline got caught in the rain? Stingray's shells won't absorb moisture and leave you with the dead sound of a wet wood shell.

Year after year, through all kinds of weather and against all odds, Stingray drums perform. We don't make this claim frivolously. It's backed up with an industry-leading five-year shell warranty.

At Stingray, we don't limit you to stock colors and options. Whether you are interested in the Soundwave<sup>™</sup> or an entire ensemble, give us a call. We'll work with you to custom-design a package that will take your drumline into the future.
